

BRING
THE FUTURE
TO LIFE

Livingstone®

PRICE LIST

Fully recyclable

At the end of their useful life, Livingstone® products can be recycled and crushed by means of mechanical compression. The crushed material in a powder form can also be reused in other areas and in other applications.

Livingstone® is a new method of using material, which can be represented circularly. The material flows through the various applications, various companies and products and is then used again in other products. During these circular passages, the quantity of energy used is minimal

Features

Livingstone® marble powder radiant panels are the result of patented, innovative technology studied especially to obtain maximum heating efficiency with the least energy consumption.

Thanks to the particular thermal inertia, the stored heat is gently, gradually and evenly released into the room.

Cleaning and maintenance

Always use mild products such as water and soap to clean, applying them with a soft cloth. Do not use detergents containing alcohol or abrasive products.

PRODUCT FEATURES

ECO-FRIENDLY PRODUCT

CLEAN AIR

MADE IN

SIMPLE CONTROLS

UV RESISTANT

ENERGY SAVING

EVEN TEMPERATURE

RADIANT HEAT

GENTLE INERTIAL STORAGE

COMFORT

ECO-FRIENDLY SAVINGS

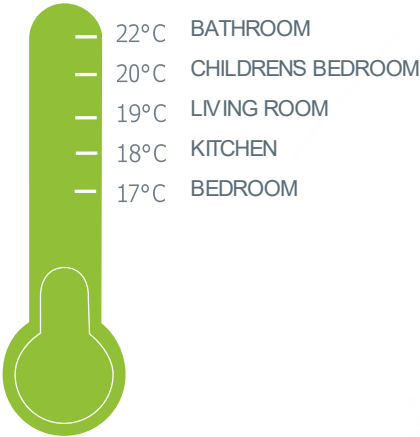

- Cold pressed manufacturing with recycled materials
- Low CO2 emissions into the environment (160 times less than aluminium)
- Fully recyclable

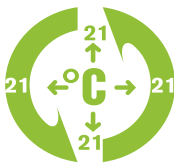

- 25% Saving thanks to the Livingstone® programmable thermostat
- 20% Saving thanks to Livingstone® radiant heat, which carries heat towards people in the room.

IDEAL

LIVINGSTONE STANDS FOR COMFORT, STORAGE AND "GENTLE" RELEASE OF HEAT

EVEN TEMPERATURE

Radiant heat provides an even temperature throughout the room to make it even more comfortable.

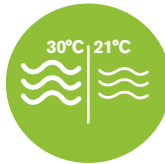

COMFORT

Traditional radiators transfer heat to the environment by circulating the air from lower areas to upper areas of the room. This phenomenon is known as convection which promotes movement of dust, which can transport mould, bacteria or dust mites, promoting the onset of allergies in sensitive individuals. Livingstone® is your ally against allergies because it does not move the dust as the heat is transferred by radiation.

Livingstone® with its radiant heat brings heat and comfort directly to people, just like the sun .

The temperature is uniform across the entire radiator surface and is transferred directly to the room . An even, uniform temperature in the room and a sensation of well-being: this is Livingstone®'s secret

STORAGE AND "GENTLE" RELEASE OF HEAT

The marble used in making Livingstone® has heat storage properties.

When the appliance is switched off there is a "gentle" release of heat, which lasts up to one and a half hour.

MARMO

THE MARMO RANGE IS
DISTINGUISHED BY THE LINEARITY
AND SIMPLICITY OF THE FORMS,
WHICH IS ENHANCED BY THE
PURENESS OF THE WHITE COLOUR.
IT IS AVAILABLE IN DIFFERENT
SIZES, WITH A SMOOTH SURFACE
FINISH AND CAN BE
CUSTOMISED USING THE SELECTION
OF AVAILABLE COLOURS.

BESPOKE • RADIATORS

**Customized radiators that
match your wallpaper**

Personalisation

Livingstone® is a customisable product: an image of your choice can be printed on the radiator's surface. This makes it possible to transform a radiant panel into a picture, an element that combines the heating function with design. Send us a picture, a painting, a print and you can have your own customised radiator to match it with the furnishings or even your wallpaper. Attention to the environment and sustainability are the principles on which Livingstone®'s entire philosophy is based. This is also reflected in the materials used to customise the panels. The colours are water based, fixed with bio compatible UV rays and free of fumes. Livingstone® can be used as a decorative element if placed in a visible position or can be hidden in the environment due to its discrete presence.

Any Image, any size any colour

CUBIK - Representation of a concrete reality.

WOW - World Of Women

ZEN - Simplicity and experience lived as the full representation of reality.

LOVE - An Asian philosophy contained in a message where everything is related to love.

CARPE - Beant of good luck and prosperity, the carp is also a symbol of courage.

PIET - The perfection of the essential, the continuous search for minimisation.
