HALLMARK PANELS

Making an Entrance

With over 20 years experience in the door manufacturing industry, *hdm* today leads the way in GFR Composite Door design, innovation and service excellence.

hdm Composite Doors are CE Marked in accordance with BS EN 14353 - 1:2004 and are built to the requirements of the Home Office Crime Reduction (Safe Secure By Design) initiative. This range of *hdm* Modern Composite Doors have been certified to PAS 24 accreditation for performance against extreme weather conditions and PAS 24 accreditation for performance against intruder and extreme physical attack methods.

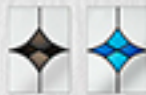

CE Marked doors comply with BS EN 14353 - 1:2004 and are built to the requirements of the Home Office Crime Reduction (Safe Secure By Design) initiative. This range of *hdm* Modern Composite Doors have been certified to PAS 24 accreditation for performance against extreme weather conditions and PAS 24 accreditation for performance against intruder and extreme physical attack methods.

CHOICE OF FRAME PROFILE

Character

Sculptural

Complete the look. Select from either a Character or Sculptural frame profile to complement existing windows & doors.

Multi-point **TRU-LOCK** collection of doors are fitted with **WINKHAUS** lock mechanisms as standard. Depending on requirements, you can choose to add the multi-point lock system shown below.

Designed **SECURE**

WINKHAUS TRU-LOCK

WINKHAUS TRU-LOCK multi-point locking systems are fitted to all other Winkhaus Collection doors as standard. Expertly engineered, the Tru-Lock mechanism is approved by the Security Design Police Initiative. Manufactured to meet the requirements of a modern door design, the Tru-Lock delivers enhanced performance using four Tru-Lock Push Thrust plates for a smooth, precise operation.

The **WINKHAUS TRU-LOCK** multi-point locking system has a slam shut operation allowing the lock to engage automatically once the door is closed. A key is then required to gain entry from the outside.

The key cylinder is positioned 140mm up the door – similar to traditional period doors. From the outside the lock is operated with a diamond or grilling push plate and from the inside by a thumbturn or key if used with an internal handle to aid door opening.

WINKHAUS
HERITAGE
LOCK

KEYWIND LOCK

Used with the S Series for handles, the Keywind lock has the cylinder positioned at eye level height. The lock is operated from the outside with a key and from the inside with a thumbturn or key if used with an internal handle.

ENTRY GUARD

The Entry Guard is an upgrade option to the Keywind Lock. This integral guard bar offers a higher security level compared to a traditional door chain.

Winkhaus Tru-Lock mechanism can be fitted to all existing doors for security, security systems specifying an upgrade to all existing doors to be in line with the new standard.

Contemporary **BAR** Handles

In addition to the more traditional lever handle shown opposite, the **SLIDE-WORK® Collection** introduces brushed **Stainless Steel BAR Handles** designed to enhance the look of the modern home and create a stunning, contemporary entrance.

Inline and offset bar handles are available in 480mm, 600mm, 650mm, 700mm, 750mm, 800mm and 850mm handle lengths.

PAS 24

The **BS PAS 24 Standard** is your assurance that our composite doors have passed a rigorous testing process to verify their air-tightness.

The **BS PAS 24 Standard** sets the performance requirements for our composite doors to the required level of wind proofing and water tightness.

PAS 231

Stainless Steel **FURNITURE**

The brushed stainless steel door furniture collection includes matching interior plates, door levers and handles, contemporary style finger knocker and door pull and push plate door knobs.

Ultimate **THERMAL** Efficiency

White Solid Timber Core Composite Door

White Timber Panelled Door

Blue White Timber Composite Door

The Blue Modern White composite doors have been tested in comparison with a white solid timber core composite door and a white timber panelled door.

The images above show the thermal efficiency of each door type. Dark blue areas indicate lower heat loss, Red and green indicates higher heat loss.

Blue Modern Doors are

10% more thermally efficient than the white solid timber core composite door, 14% more thermally efficient than the white traditional timber panelled door.

Thanks to a high performance (U) factor, its built-in insulating core, the **SLIDE-WORK® SLIDE-WORK® Collection** helps you keep the warmth in and cold and noise out.

Colour Matched **SIDE PANELS**

DEBONAIRE 2
