

Easily and quickly notify waiting customers and guests

Engage your customers faster then ever with LRS Guest Paging

CS7 Guest Pager

The CS7 Coaster allows staff to call back customers and guests when they are ready.

This eliminates a visible queue and gives the customer freedom while waiting. Staff no longer have to waste valuable working time looking for customers, simply call back their pager number.

Reduced Walk-Aways

Giving your customers a pager makes them "sticky". It's harder for waiting guests to just up and walk away when wait times are longer.

Freedom for Waiting Guests

Guests can visit the bar, patio, common areas, or restroom without having to worry about missing their call to be seated.

More Efficient Staff

Staff no longer have to search for waiting guests, they can quickly quote wait times and perform other duties.

Increased Revenue

Minimizing the time between seated or served customers means you can seat or serve more.

Features & Benefits
