# 4mph Scooters

*Lightweight scooters for getting around town.*

---

Our range of 4mph scooters are all manufactured to the highest of quality standards. Designed in the UK, we ensure all our 4mph scooters are a safe and reliable option whilst delivering high levels of comfort and style.

This range of 4mph mobility scooters are perfect for those who would prefer to travel on the pavements as opposed to driving on the road. When it comes to moving around your local town centre, going to the park, or manoeuvring through the aisles of a supermarket, a 4mph scooter is the ideal solution.

# Illusion

## The lightest mobility scooter in its class

The Illusion is a revolutionary lightweight but strong scooter which **can be disassembled** into parts for easy lifting, the heaviest part weighing less than **10kg** (similar to a bag of shopping). Taking around **30 seconds to reassemble** it ensures you won't be wasting any of your valuable time. It also features an **ultra-lightweight lithium battery** that is both accessible and simple to remove so you can easily move it to a preferred charging location. A **second charging port** is located in the tiller which allows for easy access when dissassembling is not needed. The scooter also has a **powerful LED light** for lower light driving conditions. The **tiller is height adjustable** which provides exceptional legroom even for the taller users. Furthermore, this product is manufactured with **aircraft-grade aluminium** for optimum durability ensuring top quality. Illusion is also **available with a endurance and epic battery pack** allowing you to double or triple your travel distance for those longer journeys. Not only super light, the unique shrouding is of **contemporary design**. The advanced engineered **full front and rear suspension** complete with the **fully adjustable luxury padded seat** gives a fantastically comfortable and enjoyable driving experience. Together with the **secure-grip delta handlebar**, which gives you full control over manoeuvring the scooter, it is incredibly easy to use.

\*refer to pages 66-67 for more specification\*\*subject to user weight and terrain

Heaviest Part	User Weight (max)	Travel Range (max)**	Suspension
9.9kg	18st (115kg)	10mi.(12Ah) /20mi.(21Ah) /30mi.(34Ah)	Front and Rear

# Vogue

All-round suspension for a superbly comfortable ride

The Vogue is a **wonderfully comfortable** and **fashionable scooter** in our range with **full adjustable suspension** on the front and the back which provides a smoother, and more comfortable ride. The Vogue **can be disassembled into five parts in just 30 seconds** which aids with lifting and ensures a quick and safe **lift into and out of your car**. It also has **great legroom for taller users** giving a comfortable ride for all. Another detail is the **secure-grip delta handlebar**, which gives you full control over manoeuvring the scooter. The Vogue features an **accessible battery pack** which is simple to remove so you can move it to different charging locations. Also a **second charging port is located in the tiller** which allows for easy access when dissassembling is not needed. The Vogue has an **interchangeable battery pack** which allows for a quick and cost-effective **upgrade from 12Ah to 20Ah sized batteries**, this ensures longer travel time and additional freedom. The scooter also has a **powerful LED light**, ideal for low light driving conditions.

\*refer to pages 66-67 for more specifications\*\*subject to user weight and terrain

Heaviest Part	User Weight (max)	Travel Range (max)**	Suspension
14.5kg	21st (135kg)	10mi. (12Ah) or 16mi. (20Ah)	Front and Rear

# Lithium Vogue

Lightweight battery box for super easy charging

The new Lithium Vogue is a **wonderfully comfortable** and **fashionable scooter** in our range with **full adjustable suspension** on the front and the back which provides a smoother, and more comfortable ride. The Lithium Vogue **comes as standard with a 10Ah Lithium battery, a super lightweight battery box weighing just 3kg**, making it **extremely easy to carry to your charging point**. For those who want to travel extra miles or would just like the assurance of larger batteries, there is the **Endurance 21Ah Lithium Battery Box option, weighing in at 4.5 kg** The Vogue **can be disassembled into five parts in just 30 seconds** which aids with lifting and ensures a quick and safe **lift into and out of your car**. With **great legroom this scooter is also perfect for taller users** giving a comfortable ride for all. Another detail is the **secure-grip delta handlebar**, which gives you full control over manoeuvring the scooter. The scooter also has a **powerful LED light**, ideal for low light driving conditions.

# Liberty

## Great value transportable scooter

As the name suggests the Liberty returns your independence and freedom allowing you to go places that you couldn't go before. The main feature of the Liberty is the ability to **take the scooter apart for easy transport and storage**. It is also brilliant for someone that cannot lift heavier objects, the **heaviest part weighing just 14kg** (similar to a bowling ball). This scooter is also **great value for money** for those looking for a lower cost alternative. With a cost-effective upgrade, the Liberty has an **interchangeable battery pack** which allows you to **move from 12Ah to 20Ah sized batteries**, this ensures longer travel time and additional freedom. Furthermore, the **battery pack can be removed** which allows for charging at different locations. The **unique design** of the **stylish front shroud** and the **fully adjustable seat** allows users of all heights to have a **comfortable and spacious seating position**.

\*refer to pages 66-67 for more specifications\*\*subject to user weight and terrain

Heaviest Part	User Weight (max)	Travel Range (max)**	Disassembles
14kg	21st (135kg)	10mi. (12Ah) or 16mi. (20Ah)	Yes

# Cruise

## The powerful car transportable scooter

Featuring a **heavy-duty motor** and a **weight capacity of 26 stone**, the Cruise is the **ultimate transportable pavement scooter**, perfect for tackling hills and slightly rougher terrain. With **fast and easy assembling and disassembling**, Cruise is ideal for those needing to transport the scooter. This scooter **features two charging points**, one located on the tiller for quick and easy access and one on the battery pack itself for charging at whatever location suits you. Its **large spacious foot deck** and **supportive deluxe adjustable seat** ensures a luxurious driving experience. The Cruise non-suspension and the Cruise Vantage full suspension (pg16) come with the pneumatic comfort tyres to boost and provide extra comfort. It's the small things that count, in this case, it's the **USB phone charger point** for charging on the go, the **powerful LED front light** for low light situations and the **drinks holder** for that morning coffee you missed!

\*refer to pages 66-67 for more specifications \*\*subject to user weight and terrain

Heaviest Part	User Weight (max)	Travel Range (max)**	Suspension
18kg	26st (170kg)	16mi. (22Ah)	n/a

# Vantage

## Powerful suspension car transportable

The major difference between the Cruise and the Vantage is the **incredible full suspension** which creates a seamless user experience, and a smoother and more relaxed ride, fully worth spending that little bit more. Similar to the Cruise(pg 14), the Vantage features a **heavy-duty motor** and a **weight capacity of 26 stone**, Vantage is also the **ultimate transportable pavement scooter**, perfect for tackling hills and slightly rougher terrain. With **fast and easy assembling and disassembling**, Vantage is ideal for those needing to transport the scooter. This scooter **features two charging points**, one located on the tiller for quick and easy access and one on the battery pack itself for charging at a different location. Its **large spacious foot deck** and **supportive deluxe adjustable seat** ensures a luxurious driving experience. The Vantage includes the **choice of either pneumatic comfort tyres or solid puncture-proof tyres**, the choice is yours. The additional extras make this scooter truly unique. This includes the **powerful LED front light** for dusky drives, the **drinks holder** and the **USB charger point** for when you forget to charge your phone.

\*refer to pages 66-67 for more specifications \*\*subject to user weight and terrain

Heaviest Part	User Weight (max)	Travel Range (max)**	Suspension
18kg	26st (170kg)	16mi. (22Ah)	Front and Rear

# Globe Trotter

Auto Folding with lithium battery

Revolutionarily designed to fulfil many needs, the Globe Trotter is a life-changer. This **innovative design** ensures that a **touch of a button lets you fold up your scooter** making it around a third of the size of a normal boot scooter, great for homes with limited space. The **light-weight design** and **ability to fold** makes it a great travel companion on any trip, near or far. With the **total unfolding time taking under 10 seconds**, Globe Trotter is ready anytime for all those travelling needs, creating a more relaxed and carefree atmosphere. **Recharging with the ultra-lightweight lithium battery is simple and easy** as it can be removed whether the scooter is folded or unfolded and taken to an accessible location. You can **also charge through the easy-access tiller charging point**. The Globe Trotter **can be manoeuvred in the folded position** making it effortless to move. **Four-wheel design offers more stability** with **higher ground clearance**, making it one of the safest folding scooters available. Adjusting the driving control position is simple giving **plenty of legroom** for all users. **Air safe deluxe carry bags are available** to purchase which ensures carrying the scooter is simple and straightforward.

\*refer to pages 66-67 for more specifications\*\*subject to user weight and terrain

Overall Weight	User Weight (max)	Travel Range (max)**	Auto-Folding
28kg (incl 10Ah battery)	18st (115kg)	10mi.	10 seconds

# 8mph Scooters

*Scooters for long-distance travel.*

---

Each of our state-of-the-art 8mph mobility scooters are manufactured to the highest quality standards. Designed in the UK, we ensure all our 8mph scooters are a safe and reliable option whilst delivering high levels of comfort and style. With the freedom to travel on the road at a top speed of 8mph or on the pavement at 4mph changeable with a simple flick of a switch, the powerful scooters allow long-distance travel over various terrains.

The high ground-clearance and excellent suspension on our scooters is perfect for outings in the countryside, whilst the luxurious padded seat and robust design allows for safe and secure city exploring.

# Liberator

The ultimate 8mph for comfort and style

The ultimate 8mph scooter in **manoeuvrability, luxury and comfort**, the Liberator is our **most compact 8mph scooter**. With its **sleek design** and **large powerful 50Ah batteries** this choice is brilliant for those looking for an option within this range. These features make this a great ride for many situations, from going to the shops to visiting to the local park on more rough terrain areas. **Advanced and fully adjustable front and rear suspension** paired with the **luxury double cushioned Captain seat** delivers the smooth ride with the comfort you deserve. The **compact and highly manoeuvrable design** allows you to travel in more confined areas making you feel at ease with riding in busier places, such as town centres, therefore getting where you need to go! Adjusting the driving controls is simple and easy using the **gas-assisted tiller**. With the **delta handlebar** and **high visability rear view mirrors**, steering the Liberator is effortless, giving you confidence and peace of mind. **Front and rear lights** make riding in low light conditions safe.

Tyres	User Weight (max)	Travel Range (max)**	Suspension
10in.	25st. (160kg)	25mi. (50Ah)	Front and Rear

# President

The luxury high capacity 8mph

Perfect for luxury travelling, the President offers a whole range of features to make your journey flawless. The **high capacity 75Ah batteries** give you the ability to travel long distances with **exceptional comfort and speed**, restoring your freedom, giving you new experiences every day. With the **large 13” tyres and the all-round suspension**, the President **can clear high ground** and **travel over rough terrain** offering you more flexibility in where you travel. A **fully adjustable double cushioned Captain seat** (which takes up to 28st) and **large spacious foot area** ensures exceptional amounts of comfort, perfect for all users. Thanks to the **gas-assisted tiller**, adjusting the driving controls is simple. It also proves extremely beneficial when you are getting on and off the scooter as it enables you to quickly move the tiller allowing more room to turn and stand. Other user-friendly features include **bright LED front and rear lights, easy access tiller charging port, inbuilt cup holders and heavy-duty front and side bumpers** for extra strength and safety.

NEW

# Alpha 8

Compact and manoeuvrable 8mph scooter

When looking for a compact, **manoeuvrable 8mph scooter** that has the capacity to go the distance then the Alpha 8 is the scooter of choice. Equally at **home in the high street and shopping centres or out in the countryside** traversing parkland and beaches the Alpha 8 offers the discerning user a **stylish, comfortable scooter** for all arenas. With a **compact size of 25” in width and an excellent turning circle** the Alpha 8 enables users to **easily negotiate crowded pavements and narrow pathways** and a **full sized captain seat** and **unique suspension system** ensures **supreme comfort at all times**. The **large capacity 50Ah batteries** ensures complete peace of mind for those long journeys and the **powerful motor and drive system makes light-work of steep hills**. The **extra-large 12” tyres offer outstanding ground clearance** ensuring rugged terrain is handled with ease. Small in size but enormous in capabilities; the Alpha 8 is the first choice mobility scooter for the users of today.

# Accessories

Making your ride that much easier compatible with our entire scooter range

## Stick and Crutch Holder

Built to last with its **tough and durable heavy duty steel design**, this stick and crutch holder is the perfect accessory for any scooter. With **adjustable positioning to fit all scooters** and a **fast and easy install** this holder ensures **safe and secure transport and storage**.

## Rear Storage Basket

**Easy to install, easy to hold and easy to store**, this scooter basket gives you **additional storage space** making it simple to carry more of the things you need. When not in use it **can simply be flat-packed and stored**.

## Scooter Cushions

Choose from our **two different options of scooter cushion**, the **Pearl** which offers the **gel foam cushioning** and the **Jasper** which is a **memory foam option**. Both offer **high-risk pressure relief** for scooter users. They also come with **velcro fasteners** and are **easy to fit over the existing seat** which makes for a **simple install**.

Manufactured with **VP waterproof zip-up cover**, both options **come in small and large sizes** to fit all scooters.

# ***Rise and Recliners***

*Sit down and stand up with ease*

---

Manufactured to the highest standards using steel frames and lifting mechanisms combined with the exceptionally reliable and powerful motors our chairs are built to last.

The wide choice of quality fabrics and foam fillings all conform to British furniture standards and offer excellent choice for the discerning user.

With our specifically engineered super soft fabric and a selection of luxurious back designs our chairs offer exceptional levels of comfort and joy.

With removable seat and foot covers for ease of washing, and zipped adjustable cushioning the One Rehab brand rise and recliners are in a class of their own.

# Duke

## Contemporary comfort

Combining **exceptional comfort with contemporary design**, the Duke rise and recliner guarantees **highly supportive seating** with a **cushioned back**, **soft roll-over arms** and a **multiple sprung base with generous layers of foam**. **Stand, recline and relax** in comfort and safety with the **smooth and quiet motors** of both the **single and dual motor chairs**. A **simple-to-use hand controller** makes it **easy to manoeuvre the chair** to the position you need, quickly making you comfortable. Discreet loops attached to both sides of the chair allow the controller to be hung safely in an easy to reach position and can be switched for both left and right-hand use. **Large pockets are also located on each side, expanding storage space** and allowing for easy access to the things you need. With a choice of **modern and luxurious fabric options**, you can pick the colour that best compliments your surroundings. **Seat covers are also removable and replaceable**, which allows for ease of mind when accidents or spills occur.

\*refer to pages 68-69 for more specifications

Motor Type	User Weight	Model Size	Back Style
Single and Dual	21st. (135kg)	Standard	Three Cushion

# Kingsley

Exceptional comfort with great design

Kingsley rise and recliner chair combines **exceptional comfort** with **great design**, guaranteeing **highly supportive seating** with **fully adjustable three-cushion waterfall back**, **generous layers of foam** and a **multiple sprung base**. **Smooth and quiet motors** from both the **single and dual motor models** allow **safe and easy standing and sitting**. The **simple-to-use hand controller** provides a **user-friendly experience** which is made even easier with **changeable left or right-handed use**. Located on each side of the chair are **large pockets which are perfect for storage and safekeeping**. Kingsley offers a **wide selection of fabrics** giving you more choice and variety to suit your home style. **Seat covers are also removable and replaceable**, this allows for ease of mind when accidents or spills occur. The complete Kingsley collection is **available for express delivery in both standard and compact size chairs**, in **seven luxurious fabrics** including the easy-clean leatherette.

Motor Type	User Weight (max)	Model Size	Back Style
Single and Dual	21st (135kg)	Standard and Compact	Waterfall

# Admiral

## Premium rise and recliner armchair

With its **beautiful styling, quality craftsmanship** and **great comfort and support**, the Admiral sits in our **premium range** with extra features including **generous deep filled cushioning** and a newly developed **tilt-in-space action** which can **take up to 25st**. This works by maintaining a consistent angle between the base and back of the chair as the footrest is elevated, therefore considerably **reducing the occurrence and risk of pressure sores** by **evenly spreading the pressure when seated**, and the **high leg elevation position** can also **help improve your circulation**. With **two highly supportive backs**, you can choose between the **Waterfall back with its three adjustable cushions** or the **Lateral back which provides superior lateral support**. The **range is also available in a wide collection of materials** allowing for more choice and variety in your home. A **back-lit hand controller** ensures that you can see each button easily and the **quiet motor operation** allows you to safely stand and recline. Discreet loops attached to both sides of the chair allow the controller to be hung safely in an easy to reach position and can be switched for both left and right-hand use. **Large pockets are also located on each side expanding storage space** and allowing for **easy access to all the things you need**. Also available is the Admiral Care which has vapour permeable four-way stretch breathable fabric, see page 29.

# Revolve Rotating Chair Bed

Extra wide fully profiling care bed

The Revolve Rotating Chair Bed has been specially designed to help **restore mobility and independence** to people who are struggling so they can **transfer to and from bed without assistance**. **Simple to use** and with a **touch of a button**, the Revolve bed **seamlessly and safely rotates** the user unassisted from a lying to seated position. **Easy and safe to operate**, the Revolve bed will **automatically adjust to the correct height** before rotating and **comes as standard with handrails** and **lift and lock safety sides**. The **5-section profiling action** includes **high-low adjustment** and **enables multiple positioning for supreme comfort**. The **bespoke pressure relieving mattress** comes with a **vapour permeable waterproof stretch fabric cover**. The mattress has been **designed to be attached to the profiling action**, therefore preventing mattress slippage. The **headboard, footboard and the safety side-rails are manufactured in an attractive beech wood finish** whilst the **additional handrails offer increased user safety and support**.

# Mattress Options

Find your source of comfort - compatible with our entire range

## **Balmoral Luxury Memory Extra**

Combining a generous 90mm deep layer of memory foam with the removable Aloe Vera Coolmat™ interlayer cover, the Balmoral Memory Extra Mattress provides a soft and comfortable sleep with high pressure relieving qualities. With a user weight of 18 stone and a mattress depth of 200mm, this mattress is accessible to many and is a great option for those looking for a soft and pressure relieving option.

## **Vitality Elite Modular Mattress Sprung**

The Vitality Elite Modular mattress features a soft modular top and reinforced sides ensuring independent pressure response and also aids with transfer and re-positioning. With a user weight of 39 stone and a removable vapour permeable, waterproof cover, these outstanding features are available to anyone looking for a good nights sleep.

## **Vitality Community Memory Mattress Foam**

This pressure reducing mattress is suitable for high-risk users and is compatible with most profiling beds. Reinforced sides and a soft memory foam layer give optimum pressure reduction and aid transfer and re-positioning. The removable vapour permeable and easy-clean waterproof cover comes in grey or blue. With the 28 stone user weight, this mattress is great for anyone looking for a comfortable option.

## **Kensington Luxury Pocket Memory**

With specially created coil-springs, each with their own calico pockets and contained by a high-tensile webbing to ensure complete compatibility with the profiling action, the Kensington Pocket Sprung/Memory Foam Mattress is consistently our best selling mattress. Carefully manufactured with a generous 50mm layer of memory foam and for those requiring a soft-medium pressure relieving qualities, this is one of the most comfortable mattresses available.

## **Sandringham Luxury Pocket Sprung**

Designed specifically for our profiling beds, the Sandringham is a luxury pocket sprung upholstered mattress with deep layers of fillings and independently moving British steel springs which are individually pocketed in quality calico. This accommodate for profiling action and weight distribution. It has a maximum user weight of 25st ensuring this mattress can be used by anyone.

## **Windsor Standard Memory Foam**

The Windsor Memory Foam Mattress combines the high quality Venteel™ memory foam layered carefully over a supportive firm foam base providing an ideal choice for those requiring a firm mattress with pressure relieving qualities. With 25mm of memory foam and a user weight of 18 stone, this mattress provides ultra comfort and a perfect nights sleep.

# Bed Accessories

Make it your very own.

## Waterproof Mattresses

We offer two choices of waterproof covers. Both manufactured in breathable, anti-bacterial material.

### ZIPPED – ON

- Fast and easy to fit and remove from mattress
- Available for all mattress sizes

### SEWN – ON

- Sewn on cover non – removable
- Available for all mattress sizes

## Waterproof Bed Protector

Our high quality washable bed pads (with tuck in flaps. 70cm x 90cm) offer high levels of absorbency (2.5 ltrs).

## Bed Fabrics

See all bed fabrics online at [www.onerehab.co.uk](http://www.onerehab.co.uk), or request a bed swatch from your dealer

## Bed Grab Rail

Designed to keep you safe, this Bed Grab Rail can help you to and from your bed and is fast and easy to install without the need for any tools.

Created to be compatible with all our bed range. Size: 600mm width x 360mm height.

## Drawer Layouts

Available on the Bradshaw bed only, drawers offer additional storage space. See pg. 70 for further specifications.

## Zoning

Pocket-sprung mattresses can be zoned. Edge zoning is the most popular type; the outside edge of mattress is firmed making it easier for user to transfer from and to bed whilst leaving the centre of mattress softer for sleeping.

## Massage Mattresses

The multi-massage™ system gently vibrates over the whole surface of the mattress, creating a soothing relaxing effect. Benefits include tension relief, boosted circulation and muscle relaxation. The five-point system is adjusted by the handset providing any combination of wave patterns and active zones. Massage is available on the Windsor, Balmoral and Kensington memory foam mattresses, in all sizes.

## Headboards

Our outstanding selection of contemporary headboards create a perfect finishing touch to your One Rehab profiling bed.
