

# Storage solutions designed for your business

Whether you're running a couple of trucks, a large fleet of trucks or managing numerous fleets across the UK, we're confident we have the right solution for you. From a range of cylinders, to bulk tanks, our forklift truck experts can assess your business and recommend the right refuelling solution for you.

## Cylinders

Our 12kg, 18kg and 29-litre cylinders are great for smaller businesses, who either require low level usage, or who don't have space for a bulk tank on site. They're easy to handle and can be changed in a matter of minutes.

To make life even easier, we're also able to calculate when you're likely to run out of cylinders. Based on your operational schedule we can arrange for regular weekly deliveries, so you don't won't run out.

## On-site bulk refuelling

An on-site refuelling station provides an excellent, cost effective solution for larger business users. We take care of installing the bulk tank, dispensing unit and training, while our clever auto-top system ensures you never run out.

Further more, our fixed fuel tanks are fixed to the forklift truck, so you can simply refuel the tank whilst in situ, rather than wasting time removing or replacing cylinders.

Whether you're currently using diesel, electric or a LPG supplier, call us today and we can arrange a free site survey
