

CallSwitch

HARDWARE BROCHURE

1ST OCTOBER 2018

ABOUT CALLSWITCH

Whether your customer is a busy call centre of 500+ people, or a small company of less than 5 people, it is crucial that you offer a hardware solution that can be tailored to your customers' specific needs.

With the wide range of VoIP desk phones that are currently on the market, it can be difficult to decide which brand to go for and which features will benefit your business the most – all within a budget.

We've done the hard work for you, saving you time and money - both of which you have already invested into CallSwitch. Not only offering a lifetime warranty* and no fuss 30 day RMA procedure with advanced handset replacement - add to this our hardware ranges are auto provisioned in most cases** matching your customers with the right handset couldn't be easier.

From our range of standard and high-end desktop IP phones, to clever and long range DECT phones, to innovative solutions for multi-site deployment. When designing your package for large open spaces such as factory floors, supermarkets or warehouses, we offer options which work seamlessly with our CallSwitch platform to provide the ultimate solution.

* Yealink handsets have a lifetime warranty.

** Some manufacturers and solutions may require further provisioning, speak to a member of sales for further information.

Gigaset

Made from a black polymer and with German quality and engineering, the Maxwell range is compact, stylish, uniform, and robust. You can also choose to have your Maxwell phone either free standing on a desk (with the Basic, 2, and 3 models offering up to three desktop angles), or have it wall-mounted via an optional bracket.

Unlike other IP phones on the market, the Maxwell range's wall-mounting abilities makes them the perfect choice for prestige environments such as hospitality and corporate boardrooms.

The Gigaset pro Maxwell IP phones are flexible, user-friendly, and innovative, and enhance productivity for businesses regardless of size or industry.

Gigaset IP PHONES

MAXWELL BASIC

Maxwell Basic provides all the essential features needed within a professional desktop phone ready for any office environment.

Featuring full HD audio, Maxwell Basic is designed for everyday use without compromising audio quality.

- High contrast 2.5" screen for crystal clear text
- Wall mountable
- 1Gb network switch
- POE or PSU power

Software Only License	Recurring LITE	Recurring Business
£63	£16	FOC

MAXWELL 2

A business quality VoIP phone must be intuitive, attractive and always ready to support your business. The Gigaset Maxwell 2 business phone provides all those qualities in this VoIP desktop model designed to work with any on-premise or cloud based telephone system.

The Maxwell 2's lightweight handset supports HD audio and voice, so you need not miss a single word. Volume keys ensure the right audio level and you can toggle between hands-free and the headset by merely pressing the dedicated button.

- ComPact 3.5" HD colour screen
- Wall mountable
- 1Gb network switch
- POE or PSU power

GIGASET DECT IP PRO MULTI CELL SYSTEM

The Gigaset N720 IP PRO Base Station and Gigaset N720 DM PRO DECT manager are two elements which make up the Gigaset N720 DECT IP Multicell System. Please purchase both parts for the full IP Multicell System. Up to 20 base stations and 100 handsets can be connected to the DECT manager, enabling wireless mobility with seamless handover and roaming in on-site communication. This allows employees of small to medium businesses to benefit from cordless communication throughout a site. Power over Ethernet ensures no need for additional plug points.

The N720 DECT IP Multicell System supports the latest generation of Gigaset DECT handsets, meaning users benefit from mobility in communication with exceptional HD sound. A broad range of compatible Gigaset handsets is available for different business requirements.

GIGASET N720 DECT IP MULTICELL SYSTEM

- Seamless handover and roaming
- Up to 100 users / SIP accounts / handsets
- Exceptional HD sound with HDSP™1,2
- Up to 20 base stations
- Up to 30 parallel calls
- 8 simultaneous calls per base (4 in G.722 HDSP™ mode)
- Local network directory and public online directories (white and yellow pages)
- Email reader
- Professional zero-touch auto-provisioning setup
- Power over Ethernet
- Required in addition to your DECT solution

Note: A license is not required hence the stand alone hardware price

Gigaset N720 SPK PRO SITE PLANNING KIT

We strongly suggest a full site survey before ordering any hardware – we work closely with Gigaset directly, and can offer onsite survey TRAINING and install support for your first Gigaset installation. Contact Operations for more information on opsteam@telcoswitch.com.

The Gigaset N720 SPK PRO Site Planning Kit is an easy-to-use measurement kit, used for planning new or expanding pre-existing DECT multicell installations.

Sufficient signal coverage within designated areas and the overlapping of transmitting stations are important criteria for successful installation. Every installation must be tailored to its specific environment.

This measurement kit allows you to determine the ideal positions and number of base stations for each space – ensuring seamless handover and excellent sound quality.

We have added the Gigaset survey guide for your information in the partner portal, however do contact us for more information on direct site survey and installation support from Gigaset.

PLANNING KIT FEATURES

- Easy-to-use, fast configuration
- For one/two-person operation
- Clear, simple indication of measurement values
- Test sound

Jabra

Find a headset that suits your working style. Choose from affordable corded headsets and handy wireless headsets that let you leave your desk while on a call. All headsets are available in a QD version for your desk phone or a USB version for your computer, providing a versatile solution to your working requirements. Wireless headsets come in both Bluetooth and DECT versions, so you can ensure your connection is never interrupted, and calls with those all-important customers run as smoothly as possible. What's more, you can choose noise-cancelling call centre headphones to ensure you can focus on the task at hand.

DOOR ENTRY UNITS

We work closely with CIE, offering industry leading Door Intercom and Entry Access systems. CIE are the main UK dealer for the 2N intercom / access control product range.

As our Door Entry and Access Control expert partners, CIE's system design support can help you design, configure, install and support these door intercom systems. The SIP device goes onto the LAN, and using the IP address, you can then connect it to our platform with an additional extension.

Using the leading 2N product range, our Intercom and Access Control Solutions are fully

expandable from a single door access point right up to servicing hundreds of apartments across several sites. Many of the door entry units offer HD video with night vision, clear sounding speakers and keypads. With anti vandal, camera, and keypad or card access technology, together, a bespoke solution will be developed for the solution, ensuring that your customer has exactly the right solution for your customer.

We invite you to discuss your individual requirements with our experts, who will offer you the best products and solutions tailored to suit the customer's needs.
