

My personal experience was amazing. I met a fella called Matthew Parker and he reassured me throughout my gyno surgery. 3 years later he still continues to ask if im ok, the aftercare is brilliant highly recommended. Thanks alot Matthew for all your help. Results are perfect. My life has changed thanks again.

FUE Hair Transplant - Crown Area - 5 Stars! I am truly over the moon with the result of my op and Im only 4 months in! This procedure is not something I would have done only my missus told me "if its bothering you or on your mind then just get it done"! I am a person who cant make his mind up over anything and this was a huge decision for me. So started my journey of countless research and many consultations trying to learn everything I could about these procedures. Dr Ish really stood out to me in his consultation and explained not just the procedure but what is right for me. Matthew has also been amazing with his time helping me with any questions before and after. He is proud of representing the service provided because it is so good. On the day Dr Ish and the team made it so easy for me as I was so nervous. From start to finish was a breeze and I couldnt recommend The Surgery Group enough. Thanks again to the team!

I really can't praise Surgery Group enough. The customer liaison before, during and after my FUE procedure has been faultless. Dr Ish and the team were excellent throughout the procedure and kept me fully informed of stages throughout. The prices for such excellent care are unbelievably competitive but rest assured the service received is second to none. I really can't recommend or thank the team enough. If your after a top quality hair transplant with competitive prices and superb customer service you can't go wrong with these guys.

From start to finish everything went smooth kept me up to date with everything, texted or rang me if I needed any advice. I would highly recommend them even post operations they're only a call away to answer any questions you may have.

Excellent service and aftercare, even provided takeaway pizza in evening and very informative throughout the whole process. Earls but results look very promising

Months in and the results are great so far. I would definitely recommend the surgery group and would not hesitate to use them again should the need arise.

Fantastic. This really is a great experience. I had the FUE treatment done last Saturday. I was so apprehensive on the day about it all given I'm so young (23). Honestly the team are fantastic and Dr Ish is brilliant same goes for Matthew and Jake for the post op after care. Whenever I have a question or any worries, they are so responsive to help. I am yet to see results but I look forward to seeing them over the next year. Also, I hardly ever write reviews so that must show that they're very good!!

Great team on the day and Dr Ishmail is great in skill and bedside manner. Comms throughout with Matt and support from Jake. I have already recommended to my friends.

Excellent service from start to finish. Consultation up to the mark. Everything spot on, cant answer any questions. Technicians made every after, the whole process results so far and it's only been 3 months in!
